

Introducing

DeltaMelt™

The underground heating system that can deep-six the deep-freeze for winter car wash business.

Want to turn bad winter weather into big winter business? It's easy with DeltaMelt™, the radiant underground hydronic heating system from the heating experts at Delta T Solutions.

DeltaMelt™ Does Away With Snow and Ice.

How? Efficiently and economically! A grid of cross link polyethylene (PEX) tubing installed in the concrete floor of the car wash circulates an antifreeze solution that uses a minimum amount of energy to melt the snow and ice.

You benefit from:

- Increased winter business
- Higher energy efficiency
- Lower operating costs
- Low installation costs
- Corrosion-free packaged systems
- 20-year warranty on tubing
- Faster payback
- No shoveling

DeltaMelt Does the Job for Less.

Other systems turn on when the temperature falls, and stay on until the temperature rises again. This means the system goes at full blast even if conditions don't warrant it. DeltaMelt is different. Our electronic modulating gas control valve tracks the heat load at all times, using the minimum amount of energy to melt the snow or keep ice from forming. The bottom line? DeltaMelt's high operational efficiency means you pay less. Plus our corrosion proof system eliminates the need for expensive oxygen barrier tubing.

A Complete System Tailored to Your Operation.

Delta T provides a complete hydronic heating system tailored to your operation. The system consists of the following:

- RBI high efficiency condensing boiler: with 95% energy efficiency
- Electronic modulating gas control: including on-board diagnostics for easy troubleshooting
- All combustion and intake air venting
- All copper piping
- Pre-piped boiler loop
- Cross link polyethylene (PEX) tubing: corrosion-proof and easier to install
- Manifolds with manifold boxes
- Circulating pumps

**20-YEAR
Warranty
ON TUBING**

- Customized design: tailored specifically to your operation with complete design manual for each system
- Installation and service from a single source; or the option of installing it yourself, with or without our supervision

About Delta T Solutions.

Nobody knows heating better than Delta T. With more than 20 years of dedicated HVAC experience, we've installed more than 4,000 hydronic heating systems in the last ten years.
